TOP-FILL RECLOSABLE BAG HAVING
WICKET FLAP AND RELATED
METHOD OF MANUFACTURE

ABSTRACT OF THE DISCLOSURE

5 A reclosable bag having a top flap with holes configured to allow a stack of such bags to be mounted on a wicket or a pair of dispensing posts, and having a slider-actuated zipper (e.g., a string zipper) installed in a mouth at the top of the bag. The wicket flap is suspended between two zones of attachment generally located at opposite ends of the mouth of the bag. In one embodiment, the flap is attached to the slider end stops stomped in opposing ends of the zipper.
